***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, 16-19, 24-27, 32, 35 and 36 are drawn to a disk structure, an apparatus and method for recording and/or reproducing information on a disk having plural recording layers, classified in class 369, subclass 94.
- II. Claims 12-15, 20-23, 28-31, 34 and 37 are drawn to a disk structure, an apparatus and method for recording and/or reproducing information on a disk having track data format/layout, classified in class 369, subclass 275.3.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as without require a plurality of recording layers as required in the invention I. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
